

KHOA VO

Mobile Software Engineer | Accessibility and Cross-Platform Applications

Singapore | +65 8885 5370 | khoavo.1895@gmail.com | linkedin.com/in/khoavo95

Languages: Vietnamese (native), English (fluent), Japanese (intermediate).

Mobile software engineer with 8+ years of experience delivering applications using Flutter, Dart, React Native, and TypeScript. Guided designers and developers on accessibility practices, including VoiceOver testing, and built a reusable Dart SDK to simplify integration. Experienced in end-to-end feature delivery, authentication, and production support for digital identity and global collaboration products.

Experience

Affinidi Pte. Ltd. Singapore
Mobile Engineer 2023 - August 2026

Temasek-founded technology company building privacy-first decentralized identity and data management products.

- Developed a reusable Dart SDK by migrating secure credential-exchange logic from a JavaScript bridge to pure Dart, saving an estimated 2-3 developer-days per implementation.
- Built and demonstrated a Flutter proof-of-concept app running on web, mobile, and Windows desktop to colleagues across the company, supporting the selection of Flutter as the primary development framework.
- Led the technical design and delivery of credential listing and in-chat photo sharing for H2H Connect, supporting 170+ attendees across iOS and Android during the Summit on Human Agency.
- Expanded widget-test coverage for critical chat and connection flows, bringing code coverage to 64.8%.
- Owned end-to-end implementation of Vault History and multi-credential claiming, enabling users to review past data-sharing activity and claim multiple credentials in a single flow.

Padlet Pte. Ltd. Singapore
Mobile Engineer 2021 - 2023

Padlet is a global collaboration platform serving 40M monthly users across 100+ countries.

- Led a two-week accessibility initiative across mobile, web, and design teams. Guided designers and developers on WCAG accessibility practices, worked with VoiceOver in the React Native app, and reviewed changes that helped remediate 78% of known mobile accessibility issues.
- Led the redesign of the mobile authentication flow using React Native and TypeScript, integrating four OAuth providers: Google, Apple, Microsoft and Skoletube.
- Owned quarterly, week-long mobile support rotations, resolving user-reported and telemetry-detected issues using Firebase Crashlytics and Sentry.
- Collaborated with product and design to redesign the mobile settings panel UI, with 90% of collected user feedback being positive.
- Maintained the mobile codebase across 3-5 releases per quarter, implementing automated tests and resolving approximately 20% of the critical bugs reported to the mobile team.

ACT Brain Vietnam Vietnam
Software Engineer 2017 - 2021

Vietnam-based software company serving international clients.

- Engineered key features, including real-time chroma-key video effects and song search, for an Android karaoke application, improving user satisfaction by 72%.
- Built and ran E2E test suites for a training app, achieving a 92% pass rate and reporting remaining failures before delivery.

Education

Ho Chi Minh City University of Science Ho Chi Minh, Vietnam
• Bachelor of Engineering (Computer Engineering), GPA: 3.9/5 2013 - 2017

Technical Skills

Mobile & Programming: Flutter, Dart, React Native, TypeScript, JavaScript, Android, Kotlin, Java.

Architecture & State: Riverpod, BLoC/Cubit, Redux-Saga.

Quality & Integration: VoiceOver, WCAG guidance, REST APIs, OAuth, secure storage, SQLite, unit/widget/integration/E2E testing, Jest, Maestro, Appium, Firebase Crashlytics, Sentry, Git.

Languages

Languages: Vietnamese (native), English (fluent), Japanese (intermediate).
